Summary

Hi, I'm Juhans, a GIS Analyst and Map Enthusiast with professional experience since 2016. I specialize in applying geospatial technologies to support spatial planning and environmental management, with a strong background in analyzing, visualizing, and managing spatial data for decision-making.

Over the years, I have been involved in diverse projects related to urban and regional planning, land use management, and environmental assessment, enabling me to integrate technical GIS skills with practical field knowledge.

Education

BACHELOR OF SCIENCE

Geography Department, University of Indonesia
2012 - 2016

Skills

- Understanding the Use of GIS Software
 - *ArcGIS Desktop*
 - *ArcGIS Pro / Online*
 - *Quantum GIS*
 - *Global Mapper*
 - *PCI Geomatica*
- Understanding the Concept of Using Surveying and Mapping Tools
- Understanding the Concept of Presenting Informative Maps in Accordance with Cartographic Principles and Regulatory Rules
- Understanding Geodatabase Development
- Understanding the Basics of Database Development and Basic Programming Languages
- Understanding the Use of Computers and General Software
- Ability to Adapt and Learn New Things

Experiences

GIS SPECIALIST
